PURE WATER FILTER

INNOVATIVE AND
EFFECTIVE

SUSTAINABLE
AND COST-EFFICIENT

EZ1PRO+™

EZ1PRO+™

Innovative and effective Sustainable and cost-efficient

- + 12,5 Liter demineralization capacity
- + easy and timesaving resin exchange on any moment or place
- + permanent quality control by integrated conductivity measurement
- + smooth opening and closing of the lid
- + high exit pressure and superior pure water stream for effective cleaning
- + stainless steel pressure housing and aluminum lid
- + **possibility to work with 2 persons at the same time**
- + ion exchange granulates in Fastbag™ system or using loose resin
- + optional chemical injector for pre-cleaning and 3rd operator
- + easy transportable
- + pressure relief valve

Ettore 1-stage filtration

The Ettore EZ1 Pro+ is equipped with the Ettore Fastbag™ system. This allows fast and clean changing of the 12,5 liter mixbed resin.

The Fastbag™ can be filled either with regenerable mixed resin or 1-way disposable resin. The Fastbag™ can be refilled by the end-user or the service can be handled through the local distributor.

It is also possible to fill the EZ1-tank with loose mixed resin.

Using regeneration mixed resin will substantially lower the cost of operation and is a "Green" sustainable option as the mixed resin can be re-generated over and over again and will save the valuable material for many future uses.

AQUACLEAN™

Aquaclean NEW Carbon Fiber Pole System

Carbon Fiber Pole System

- Choose between 6 pole length options, starting from 10-60 ft (3-18M) to a collapsed length of 47 inch (1,15M)
- Ideal sizes for ground level work and all sizes easily transport in smaller vehicles
- Carbon fiber design provides even greater rigidity than any pole on the market, perfect for effortless brush control
- Each pole has an aluminum outer tube to offer added strength while protecting the expensive carbon fiber inner poles

Durable Plastic/Rubber Endcap

- Prevents accidental damage to the end of the pole
- Features a side aperture for the hose exit to prevent hose kinking and damage

Multifunction Clamping System

- All clamps positively lock each section - preventing unintended pole collapse
- No glueing - if you ever need to replace a pole section or a clamp they easily bolt on and off
- Each clamp has a tapered bottom to prevent getting caught on window sills or branches
- The tapered bottom keeps the clamps separated to prevent pinch points
- Each clamp has easy but positive locking tabs that are simple to lock and unlock, but won't release unintentionally

All AQUACLEAN New Carbon Fiber Pole systems are designed to deliver the precise balance between rigidity and weight. Durability and strength are never compromised.

The Professionals Edge Since 1936

Welcome to the Future of Cleaning

Ettore Steccone invented the window squeegee over eighty years ago in Oakland, California. His T-shaped patented tool, manufactured of brass with a precision slit natural rubber blade, dried windows streak-free and became the standard to clean glass worldwide.

Today, his family still runs the business and continues his legacy by bringing quality products for the professional end-user. The spirit to innovate and discover new and better ways to clean is signature for Ettore Products Company. As we look to the future, with ever increasing glass and solar panels to be cleaned, our goal is to remain at the forefront of innovation and continue to produce the finest cleaning tools available. This EZ1 Pro+ Pure Water Filter was made with one goal in mind. To make the best Pure Water Filter in the market, to save water and to allow the regeneration of resin, minimizing environmental impact and cost of ownership.

The EZ1 Pro+ Pure Water Filter can be used with re-generable resin loose or in our EZ1 Pro+ FASTBAG™.
